

ENVIRONMENTAL MANAGEMENT Policy Statement

Emeco acknowledges its responsibility to minimise impacts on the environment arising from its business activities. Emeco is committed to achieving excellence in the environmental management of all Emeco’s business activities and conducting those activities in a socially responsible manner that is designed to respect the environment.

To achieve this Emeco will:

- Develop and implement effective management systems and processes that encourage proactive environmental management and continuous improvement of environmental performance.
- Integrate environmental management into all relevant facets of its business.
- Actively promote “reduce, reuse and recycle” practices throughout all business areas and activities.
- Comply with or exceed all relevant legislation, applicable standards and guidelines, and all relevant policies and procedures.
- Provide the required financial, human and material resources necessary to achieve an excellent standard of environmental management.
- Design and develop new facilities with regard to environmental impact and, where practicable, seek to reduce the impact of business activities on the environment through the efficient use of energy and water, as well as responsible handling of waste and other materials.
- Ensure its employees and vendors are aware of the environmental commitment outlined in this Policy Statement and ensure they are provided with environmental awareness training and understand their accountability for their individual and corporate environmental responsibilities.
- Actively seek innovative and sustainable solutions to meet environmental needs.

This policy will be reviewed periodically to ensure it remains relevant to the needs of Emeco and its stakeholders. We will be successful when we achieve our aim of excellence in environmental management practices and no environmental incidents.

Ian Testrow
Chief Executive Officer
